

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

A 1. (currently amended): A method of implementing an audition system, which includes carrying out a preliminary examination involving a predetermined workout exercised by a person before an audition, via communication between a center side and a personal-terminal cell phone that is owned by a person and assigned with personal identification information, the method comprising the steps of:

obtaining, as personal record data, a result of a the workout exercised by the person;  
producing a total personal password with reference to the personal identification information and the personal record data; and  
transmitting the total personal password, together with the personal identification information assigned to the cell phone, to the center side.

2. (currently amended): A method as claimed in claim 1, further comprising in the center side the steps of:

receiving the personal identification information and the total personal password;  
extracting personal identification information from the total personal password as a detected personal identification information; and  
collating the detected personal identification information with the personal identification information received from the cell phone and specified by a cell phone number to detect whether or not both are coincident with each other and to confirm whether or not the person is authorized.

3. (currently amended): A method as claimed in claim 2, further comprising the steps of:  
judging the personal record data included in the total personal password to produce a result of judgment from the result of the workout, only when the detected personal identification information is coincident with the received personal identification information and the person is authorized; and

transmitting the result of judgment from the center side only to the cell phone specified  
by using the received personal identification information to the personal terminal.

4. (original): A method as claimed in claim 3, comprising the steps of:

judging that the person is not authorized when the detected personal identification  
information is not coincident with the received personal identification information; and

carrying out neither judgment of the personal record data nor transmission of any data to  
the person when in-coincidence is detected between the detected personal identification  
information and the received personal identification information.

5. (original): A method as claimed in claim 1, wherein the personal record data are  
representative of the result of the workout obtained by exercising a predetermined program  
designated by the center side.

6. (original): A method as claimed in claim 5, wherein the predetermined program  
comprises the steps of:

producing the personal record data by practicing a game; and

generating the total personal password from the personal identification information and  
the personal record data.

7. (currently amended): A method as claimed in claim 5, wherein the predetermined  
program comprises the steps of:

executing a predetermined educational program to obtain, as the result of the workout, a  
result of executing the predetermined educational program and to generate the result of executing  
as the personal record data; and

generating the total personal password from the result of executing and the personal  
identification information.

8. (currently amended): A computer-readable recording medium which stores a program  
and which is used in an audition system to carry out a preliminary examination,

the program comprising the steps of:

requesting a person using the recording medium to input personal identification  
information;

generating an execution result obtained by executing the program; and  
producing a total personal password of the person from the personal identification information and the execution result.

9. (original): A computer-readable recording medium as claimed in claim 8, said program further comprising the step of:

executing a predetermined game program to obtain a game program execution result and to generate the game program execution result as the execution result.

10. (original): A computer-readable recording mediums as claimed in claim 8, said program further comprising the step of:

executing a predetermined educational program to obtain an educational program execution result and to generate the educational program execution result as the execution result.

11. - 14. (canceled):

15. (currently amended): ~~A mobile communication~~ An audition system comprising a program processing device for processing a program stored in a recording medium attached thereto and a ~~mobile terminal~~ cell phone communicable with the program processing device, and assigned with a cell phone number, wherein the audition system carrying out a preliminary examination involving a predetermined workout exercised by a person before an audition to screen candidates;

the program processing device comprises:

means for inputting personal identification information representative of a person using the recording medium;

means for executing the program to produce a result of executing the program;

means for generating a total personal password related to the person on the basis of the personal identification information and the result of executing the program;

the ~~mobile terminal~~ cell phone comprising:

means for transmitting the personal identification information and the total personal password.

16. (currently amended): ~~A mobile communication~~ An audition system as claimed in claim 15, wherein the program processing device is implemented by a portable game machine while the program is a game program for the mobile game machine.

17-24. (canceled):

A 1  
25. (new): An audition system for use in executing a preliminary examination, involving a predetermined workout exercised by a person before an audition/test, by carrying out communication between a center side and a cell phone owned by a person and assigned with a cell phone number, wherein:

the cell phone comprising:

transmitting means for transmitting, together with the cell phone number, a total personal password including a result of a workout exercised by the person to the center side;

the center side comprising:

means for receiving the cell phone number and the total personal password;

means for extracting the cell phone number from the total personal password as a detected cell phone number; and

means for collating the detected cell phone number with the cell phone number received from the cell phone, to detect whether or not both are coincident with each other and to confirm whether or not the person is authorized.

26. (new): An audition system as claimed in claim 25, further comprising:

means for judging the result of the workout included in the total personal password to produce a result of judgment, only when the detected cell phone number is coincident with the received cell phone number and the person is authorized; and

means for transmitting the result of judgment from the center side only to the cell phone specified by the received cell phone number.
